BeHappyProtocol Whitepaper

Last updated: 26th of November 2023

Introduction

BeHappyProtocol is the culmination of our personal quest for happiness. We discovered that inner peace and joy don't always depend on external circumstances. United with the mission to help others unlock this inner world and overcome stress and negative influences. We believe true happiness isn't something you can buy or measure with money. It resides within each of us, and we're ready to help you find it.

Leveraging innovative approaches such as blockchain technology, artificial intelligence, and visual communication, we strive to support your personal self-realization on physical, mental and emotional levels within our metaverce.

Our team comprises crypto enthusiasts, inventors, innovators, investors, artists, creators, and citizens – everyone feeling the internal need to find more in this world. The "BeHappyProtocol" initiative aims to address the pressing issues of low happiness levels and mental anxiety among modern individuals. Join our initiative, and together we'll explore a new path to happiness and well-being.

How to Get Started

1. Explore Guides and Find Your Impact Zone:
Your first step with BeHappy is to find answers in our guides and choose an area where you can participate and impact the community's activities (🤙🤘).

2. Join Social Media Channels:
Stay connected and informed by joining our social media channels:

- Youtube
- TikTok
- Instagram

- Telegram
- X
- CMC

3. Engage with Our Community:
Meet like-minded individuals, share your thoughts, and discover new friends in our

active community. Together, we're creating something special! (🌐👥)

4. Participate in Projects:
Get involved in our exciting projects and events to actively contribute to the development of BeHappy and the community (🚀🌈).

5. Spread Joy and Share Experiences:
Let your positive energy and experiences become part of our shared journey. Make the world happier together with BeHappy! (😊🌍)

Our Mission and Vision

Empowering Creators and Organizations Through Our 😊 User-Friendly 👪 Metaverse Builder.

Vision: Our vision is to create a world where technological progress and solutions to complex problems are accompanied by an elevation in well-being. We aim to become the global leader (#1) in combining blockchain, artificial intelligence, and visual communication to support mental health and consciousness development for communities.

In this psysical world, harmony and happiness will form the foundation for every individual, both at work and in personal life. By Solving real world chanllenges we aim to build a happy virtual world.

Mission: Our mission is grounded in alarming statistical data, with over 50% of workers experiencing burnout, and every third person facing stress in family life, often due to the fear of missing out (FOMO), loss of awareness, or misinformation. Therefore, we utilize cutting-edge technologies such as blockchain, artificial intelligence, and visual communication, interacting with people through social networks and other products to disseminate and embody innovative solutions.

Challenges We Address

In our text, we'll delve into issues such as connecting to a source of energy, navigating social networks, JOMO (Joy of Missing Out) versus FOMO (Fear Of Missing Out), conscious tracking of internal states, and share our vision on these problems. We aim to showcase how "BeHappyProtocol" contributes to improving the quality of life and happiness in the modern world.

Cultural Positioning

Why would the world be worse off if "BeHappyProtocol" doesn't launch or disappears? "If "BeHappyProtocol" doesn't launch or disappears, it may lead to the spread of FOMO and unreliable information, which, in turn, can worsen people's mental health, overall well-being, and level of consciousness."

We take pride in the culture we've created and believe in our community's ability to achieve great results. Every time, we are ready to DEMONSTRATE the fruits of our labor. 🚀 By contributing to the development of the quantum economy and community awareness of our planetary system.

🌟 Interest: This principle is our daily motivation. It drives us to continually improve our skills and bring truly interesting projects to life.

🌟 Autonomy: We value autonomy and independence in decision-making and actions of each participant. This allows each of us to self-realize and gain our own experience.

🌟 Helping People: Our relationships are based on closeness and transparency. This strengthens us as a team, always ready to support and help to other people.

Our Approach

Like in the movie "The Matrix," where average characters go about as if asleep while others try to awaken from the slumber, we invite you to delve deeper into understanding your problems and discover the world of awakening. We aren't just developing the crypto community; we are evolving ourselves. *Join us in this quest for happiness and well-being with BeHappyProtocol.*

Empowering Creators:
BeHappyProtocol is more than a metaverse builder; it's a powerful force that empowers creators. Envision a realm where dreams pulsate with the vitality of genuine connections. HappyLand is not merely a canvas; it's a living masterpiece, where every creative stroke adds to the vibrant tapestry of the their own metaverse.

At the Core - HappyDAO:
At the heart of BeHappyProtocol throbs the HappyDAO, a decentralized sanctuary where the Joy of Missing Out (JOMO) propels a collective odyssey. Here, every voice contributes to shaping a protocol founded on transparency, democracy, and the genuine creation of value.

Quantum Economy:
Yet, BeHappyProtocol is more than the sum of its technological marvels. It's a Quantum Economy, a space where financial rewards intertwine with the well-being of

its participants. Unique NFT nominations through HappyDAO celebrate milestones, transforming achievements into immortalized digital art.

Rebellion Against Traditional Structures:

This isn't just a project; it's a rebellion against traditional structures. BeHappyProtocol disrupts the status quo, empowering individuals to thrive beyond the confines of outdated hierarchies. It's a movement, an ecosystem where people don't just participate; they co-create a world where happiness and innovation reign supreme.

The Enduring Power of Community Docs:

BeHappyProtocol Documentation serves as a guiding beacon for individuals embarking on their journey of personal and professional growth. Tailored for entrepreneurs and those navigating the intricacies of work and relationships, our protocol is a treasure trove of insights, enhancing agility and functionality while offering practical advice for project building.

Venturing beyond individuals to organizations, our aim is to lay the foundation for a positive cultural shift. As we set sail into the Metaverse, addressing real-world challenges, we weave together experiences from work, family, and education. Essential pipelines ensure individuals receive must-have information, preparing them for a seamless transition into the Metaverse.

Adding a unique touch, our Family and Work Vibes infuse the documentation with a collection of themes covering communication, motivation, and more. These vibes create a harmonious blend of knowledge and practicality, preparing individuals not only for success in the Metaverse but also for building fulfilling lives in the real world.

In our mission to bring a positive and user-friendly Metaverse experience, we follow a roadmap that begins by building tangible solutions in the real world. As we link our audience and provide them with a taste of the Metaverse, our vision extends to enabling other organizations to join us in this journey. They can leverage our developed products and innovations, contributing to a collective, vibrant future.

In a revolutionary leap beyond traditional structures, BHP stands as a beacon of empowerment, fostering a new quantum economy. Through dynamic initiatives in education, engagement, and collaborative efforts, the project envisions a self-sustaining ecosystem where individuals flourish independently of outdated norms. This quantum economy is not merely about financial gains but a collective endeavor where participants actively contribute to the well-being of the whole.

BHP embodies a revolutionary spirit, propelling individuals into a realm where prosperity and collaboration redefine the very essence of success, marking a paradigm shift in the landscape of empowerment and economic innovation.

Concept of BeHappyProtocol:

Here are the key elements that constitute the essence of the project:

1. **NFTSCAN - Rating System for NFTs:**

   - In a digital landscape dominated by unique and irreplaceable assets, NFTSCAN emerges as a transformative force, introducing a specialized ranking system exclusively for NFTs. Similar to how Ethscan revolutionized Ethereum exploration, NFTSCAN redefines the NFT experience with an intuitive, cross-blockchain interface. This platform not only simplifies NFT rankings but also transcends blockchain boundaries, allowing seamless navigation across the intricate world of non-fungible assets.

   - Beyond being an exploration tool, NFTSCAN serves as a catalyst for empowerment within the BeHappyProtocol ecosystem. It acts as a bridge between physical and digital realms, enabling individuals to align their lives with their values through NFT engagement. As a testament to the value and creativity embedded in NFTs, BeHappy introduces a rewarding system for NFT owners via NFTSCAN. Unique NFTs, distinguished for their creativity and community significance, stand to receive monthly rewards in JOMO governance tokens. This innovative use case not only celebrates diverse narratives within the NFT space but also fosters a dynamic and rewarding environment for NFT enthusiasts within the BeHappy community.

     NFTSCAN operates as the guardian of transparency and trust in the NFT space. Functioning as a robust rating system, it provides valuable insights into the value and NFT reputation. This tool empowers users by offering clarity in the NFT realm, cutting through digital noise. More than just a rating system, NFTSCAN ensures users navigate the NFT space with confidence, armed with insights and trust.

     - Utilising GoPlus products **NFT Security API**

     - Utilising Alchemy producs **NFT Fetching**

     - Utilising Etherscan API

     - and many more

2. **HappyLand Ecosystem - Metaverce Builder:**

   - HappyLand, at its core, is the visionary metaverse developed by BeHappyProtocol, offering a canvas for boundless creativity and community engagement. Central to this digital realm are PIXEL NFTs, where 1,000,000

pixels, organized into unique NFTs of 100x100 pixels each, form a lively and ever-evolving mosaic that defines the HappyLand experience.

- For PIXEL NFT owners, it's not just about digital art ownership; it's an active role in shaping the metaverse's narrative. Annually, a significant NFT captures a momentous snapshot in HappyLand's history, awarded to a PIXEL NFT owner. This unique integration of creativity, ownership, and community engagement defines the HappyLand experience.

  - The integration of key components such as HappyDAO and HappyTracker within HappyLand creates a seamless and interconnected ecosystem. HappyDAO serves as the decentralized governance backbone, empowering community members to actively participate, vote, and influence the direction of the metaverse through the Joy of Missing Out (JOMO) philosophy.

  - HappyTracker, our groundbreaking solution, redefines the tracking and enhancement of users' happiness and well-being. Using advanced AI and ML, it offers personalized recommendations for an improved quality of life. Accessible through a user-friendly Telegram chatbot or mobile app, HappyTracker ensures complete anonymity while empowering users to actively participate in their well-being journey.

- In envisioning a future where individual and collective expressions thrive, HappyLand goes beyond as a space designed to be entrepreneur-friendly. BeHappyProtocol provides entrepreneurs with the tools they need within the HappyLand ecosystem, including HappyDAO and HappyTracker, along with open-source code and comprehensive documentation for developers. At the core of BeHappyProtocol is HappyLand, a dynamic metaverse builder that offers a revolutionary canvas for communities to flourish.

- Entrepreneurs and organizations are invited to explore guides, connect with developers, and embark on their metaverse-building journey through various channels, including Gitbook and developer chat support. This isn't just a vision; it's the unfolding reality where creativity knows no bounds. Esteemed entities like the Oscars or Eurovision can now innovate, collaborate, and celebrate within HappyLand, showcasing the limitless possibilities of the metaverse.

- **Oscar's and Eurovision's Journey with Us:** Picture the renowned Oscars or Eurovision leveraging our HappyDAO and HappyLand, HappyTracker solutions. Imagine Oscar crafting its metaverse, utilizing bespoke tokenomics

to redefine how awards and recognition unfold. Even esteemed entities like the Oscars find a space to innovate, collaborate

3. **HappyTracker - Flagship Users Data**:

- Redefines the tracking and enhancement of users' happiness and well-being. It introduces an innovative approach to social responsibility, recognizing the uniqueness of each individual with their preferences and needs, akin to the approach used on the ahref website. The significance of tracking happiness levels and internal states lies in creating tools for personal well-being improvement and effective emotional state management.

- Utilizing Artificial Intelligence (AI) and Machine Learning (ML) to analyze this data paves the way for personalized recommendations and strategies to enhance the quality of life. HappyTracker is accessible through a Telegram chatbot or mobile application, allowing users to track their internal states and receive analytics. All data can be entirely anonymous, and if a user desires, they can be made public on the website or even stored in the blockchain for maximum security and non-loss of valuable information.

  This ensures complete user confidentiality and anonymity while enabling them to contribute to the community and programs aimed at improving their well-being and happiness. HappyTracker goes beyond traditional data tracking; it's a tool that empowers users to actively participate in their own happiness journey and contribute to the collective pursuit of well-being.

4. **HappyDAO - Decentralized Autonomous Organization:**

- Community-driven platform that empowers individuals to unleash their creativity and contribute to positive change through blockchain technology. More than just a community, HappyDAO is a force for impactful projects, recognizing the unique spark of creativity within each participant.

  Key Features and Benefits:

  - **Decentralized Governance:**

    - HappyDAO embodies decentralized decision-making, where community members actively participate, vote, and shape the direction of the protocol.

    - The Joy of Missing Out (JOMO) token serves as the governance backbone, creating a democratic structure where every voice matters.

  - **NFT Nominations and Recognition:**

- Unique NFT nominations within HappyDAO provide an innovative way to celebrate community achievements and recognize outstanding contributions.
- Categories span diverse talents, appreciating the richness of skills enriching the HappyDAO ecosystem.
  - Game Changer: Best Blockchain Gaming Project
  - Yield Yielder: Best Yield Farming Protocol
  - Meme Magic: Best Memes in the Crypto Space
  - Cross-Chain Conqueror: Best Cross-Chain Interoperability Project

- **JOMO Token and Governance Powers:**
  - The governance structure, coupled with the JOMO token, establishes an innovative system for decision-making and platform management.
  - Token holders actively participate in shaping the direction of the BeHappyProtocol, and JOMO tokens are distributed monthly to grant governance powers.

- **Innovative Problem-Solving:**
  - HappyDAO proposes a playful approach to address seven fundamental global issues, providing satisfaction at every step and utilizing blockchain to incentivize participants.
  - Contributions go beyond a drop in the ocean; each participant holds the key to creating positive change in the world.

Tokenomics:

Our BeHappyProtocol (BHP) token, boasting a maximum supply of 1,618,000,000, is intricately crafted around the golden ratio, laying the foundation for a harmonious and sustainable ecosystem. Let's delve into the comprehensive distribution plan:

Treasury Sale (20%):
Ensuring a fair and decentralized distribution, the treasury sale utilizes a presale mechanism, unlocking 20% upon sales from our website on fixed price. This approach mirrors real-world value growth, akin to life's natural progression.

Presale Structure:

- Initial rate: 0.001 USDT = 0.0000005 ETH (unlocking the first 20%)

- 0.003 USDT = 0.003 / 2000 USDT ETH RATE = 0.0000015 ETH (up to 40%)

- 0.008 USDT = 0.008 / 2000 USDT ETH RATE = 0.000004 ETH (up to 60%)

- 0.021 USDT = 0.021 / 2000 USDT ETH RATE = 0.0000105 ETH (up to 80%)

- Gradual increase up to 0.034 USDT = 0.000017 ETH (unlocking up to 100%)

Liquidity and Locking (20%):
Allocating 20% for liquidity creation on DEX enhances market stability. LP tokens are securely locked on UNCX for a substantial 6-year period untill 2030, ensuring reliable and convenient trading.

Staking Awards (20%):
Crafted to incentivize staking and encourage long-term commitment. This mechanism encourages participants to not only stake more tokens but also commit to longer durations, maximizing their potential rewards within the staking program

Weighted Staking:

- Example: If someone stakes 1,000 BHP tokens for 90 days (with a 1.5x duration multiplier), their weighted staking reward is 1,000 tokens * 1.5 multiplier = 1,500 tokens.

    - Duration multipliers: 1x for 30 days, 1.5x for 90 days, 2x for 180 days, 2.5x for 360 days.

Reward Distribution:

- APY varies based on stake duration and amount.

- Planned distribution of 4% of the total supply over 5 months, totaling 20% which is 64,600,000 tokens.

- Cyclic distribution for 5 epochs, summing up to 323,000,000 BHP tokens.

    - Person A's share of the total stake: 1,000 BHP / 3,000 BHP = 1/3 or approximately 33.33%.

    - Person B's share of the total stake: 2,000 BHP / 3,000 BHP = 2/3 or approximately 66.67%.

Ecosystem Awards (20%):
This allocation is dedicated to recognizing and rewarding active participants within our ecosystem. From content creators to community builders, these awards aim to incentivize valuable contributions that contribute to the vibrancy and development of BeHappyProtocol.

Marketing Awards (20%):
A significant portion of the funds will be strategically allocated to marketing initiatives, advertising campaigns, listings and key partnerships. These efforts are vital for enhancing our project's visibility, reaching new audiences, and fostering a robust community. By investing in marketing awards, we aim to amplify our initiative's recognition and drive widespread adoption.

Why $BHP has Value:

TX Royalty:
From March 11, 2024, each BHP transaction incurs a 0.618% royalty. Of this, 0.309% burns, supporting the project's author, and another 0.309% aids initiatives from the organization's wallet. That would save us from selling assets or stop working because we are out of resources.

Access to Ecosystem:
Own BHP tokens equivalent to a 401K for access to ecosystem products and closed community channels. By holding certain amount you will get access to more resources.

Subscription or Fixedprice:
To fork, support, , consult and use any other our community build products or webinars we might ask you to lock your BHP tokens, as per subscription model in terms to create real tokenomics and engagment.

DAO Protocol Injected:
Holding BHP enables active participation in voting for protocol improvements. JOMO tokens are rewarded at a 1:1 ratio for every 100,000 blocks, balance will be actualised during every transaction (buy, sell, transfer).

How community get rewards are tokenomics spreads:

The community network rewards active participants with gifts in BHP funded by the exchange commission. This commission is redistributed to the community development fund. Every transaction in the network contributes to the path of happiness and the development of the quantum economy. It's that simple!

Every organization in the metaverce will follow simple tokenomics KISS model:

The project defines four main categories of contributors, each with its own responsibilities and work schedule. Fully engaged contributors (Category 1.1)

dedicate 100% of their time to the project, always ready to be in touch and have the highest priority.

Partially engaged contributors (Category 1.2) allocate 80 to 100 hours per month to the project. They may not always be in touch but work within a set schedule.

Freelance contributors (Category 1.3) allocate 45 to 60 hours per month, have a more flexible schedule, and lower commitment levels.

Regular contributors (Category 1.4) have minimal engagement, working up to 45 hours per month and not always in touch.

Project reporting includes several stages: at the beginning of the month, contributors provide their plans and key tasks for the month, tasks for the week are determined, and an overall plan is developed.

At the beginning of each week, plans for the week are clarified, and specific tasks are defined. At the end of the week or month, a demonstration of the completed work, an assessment of the results, and feedback from contributors and other team members take place.

The assessment of individual tasks includes identifying key areas of activity, establishing the number of hours or resources for each activity, evaluating task performance, and satisfaction with the work. Measuring the level of satisfaction with activities, also known as the happiness level, and effectiveness are integral elements of our ecosystem. For more informationyou can check SCRUM guidlines.

Roadmap:

1. **Prototype Showcase (A2 2023):**

   - Unveiled the NFTScan prototype, a robust NFT rating system, currently well-described.

2. **HappyLand Pixel Showcase (A3 2023):**

   - Introduced the pixelated landscape of HappyLand, offering users a glimpse into the metaverse.

3. **Launching Staking for Holders (A4 2023):**

   - Initiated the stacking feature, providing holders with an opportunity to engage and benefit from the ecosystem.

4. **Documentation Release (A4 2023):**

- Released comprehensive documentation for HappyLand and HappyDAO. Whether in Notion, Gitbook, or other formats, this documentation covers the workings, principles, and constitution of our metaverse, offering users detailed insights and tools.

5. **HappyDAO Activation and Community Voting (A1 2024):**

- Activated HappyDAO, enabling community members to actively participate and vote using the Community Gov Token JOMO. This phase marks a significant step towards decentralized governance.

6. **Education, Community Building, and Tool Practice (A1 2024):**

- Conducted various courses, community-building activities, and engaged influencers relevant to the theme. This period focused on practical sessions, bringing users closer to the tools and enhancing the overall community experience.

7. **Award NFT Minting and HappyDAO Voting (A2 2024):**

- Introduced voting within HappyDAO for minting Award NFTs, spanning various categories to celebrate community achievements.

8. **Tools for External Organizations and Potential L2 Integration (A2 2024):**

- Opened up tools for external organizations, including entities like Oscar and others. Additionally, explored the possibility of integrating with Layer 2 (L2) sidechains for enhanced scalability.

9. **HappyTracker Integration (A3 2024):**

- Integrated HappyTracker, a tool designed to gather qualitative feedback, monitor internal dynamics, and analyze data using AI. This step aims to enhance the overall ecosystem's health and performance.

10. **Scaling and Global Expansion (Ongoing):**

- Continued with the scaling efforts, ensuring widespread adoption and the integration of new features to create a thriving community of joyful citizens.

Join us at BeHappyProtocol Documentation, where guidance meets vibrancy, paving the way for a balanced and fulfilling future. Feel free to suggest any further adjustments or specific details though DAO or via email, etk community chats.

Appendix:

Social Responsibility at the Core of Our Project

We place a strong emphasis on social responsibility, shaping the distribution of our resources and priorities.

Regarding the allocation of stablecoins we have collect or extra incoming transactions we intend to distribute them according to the following scheme:

- 20% for the defense forces of the Civilized World

- 20% for charity

- 20% as royalties to the team

- 20% for the organization's development

- 20% in the organization's reserve

Our world faces a myriad of challenges, from conflicts to technological transformations. We have chosen the path of consciously redirecting excess energy towards positive change. We believe that our responsibility lies in assisting the forces of good in the face of modern realities. Among the choices, we have opted to channel our energy into creating a better future for our children.

Harmony in Work and Life

We plan to educate about the opportunities to build a harmonious life within the framework of the quantum economy for communities. By focusing on biologically sound interactions, we believe that achieving ecological and happy outcomes is possible. Our goal is to make the world better for everyone, emphasizing positive changes and ecological approaches.

Additional Sections:

1. FAQ (Frequently Asked Questions):

   - In this section, you will find answers to the most common questions about HappyDAO, its goals, functionality, and conditions for participating in the community. https://tooktook.notion.site/FAQ-826a30ea73214126830e0bfce8666cb4

2. Transparency:

- Our team strives for complete transparency in all aspects of HappyDAO and BHP. Here, you can explore our public blockchain reports, asset statements, and other information that supports openness and trust.

3. Privacy Policy:

- We value the protection of your personal data. In this section, you can familiarize yourself with our privacy policy and how we process your information.

4. Disclaimer:

- HappyDAO is not a financial advisor and does not engage in the sale and promotion of its services to Americans. We disclaim any responsibility for any schemes or financial combinations. It's essential to review the terms and rules of HappyDAO before participating in the project.

5. Life Perspectives:

- Anyone can find happiness — from those planting a tree to those cutting it down or even those with just $2 in their pocket. This section is dedicated to the diversity and variety of happiness definitions for each individual.
